## SPEAKS ON DEATH

*If you have lived joyously, you will be ready to welcome death too – invite her for a dance! Death is powerful only over people who have never lived, who don't have the courage to relax peacefully in moments of death without any fear -- because no accident, no disease, nothing can make even a dent in your consciousness; you are always intact."*  
- The Hidden Splendour, Chapter #10.

*Death is not an accident. It is not that suddenly one day, out of the blue, death comes and you are finished. No, death grows with you, side by side, just like your shadow. The day you were born, you started dying too.*

*Always remember that death is coming, and death is the criterion: whatever death disproves is disproved, whatever death approves is approved. Whatever can go beyond death, whatever is more powerful than death, is the reality. The real cannot die; the unreal dies a thousand and one deaths." - Hsin Hsin Ming: The Book of Nothing, Chapter #4*

*Death and life are two aspects of the same coin, two wheels of the same cart. You become so enchanted with life that you never see that death is also growing with you. It is a growth; just as life will take seventy years to come to its climax, death will also take seventy years to come to its climax. And only in the climax, do they meet. They have been always moving together, but in the crescendo of your life they are not even together -- they are one" The Messiah, Vol 2, Chapter #18*

*Life and death appear as opposites because you are divided. Otherwise life becomes death, death becomes life. You are born, and that very day you have started to die. And the moment you die a new life has come into being. It is a circle -- the yin and yang circle."*
